

POOJA BASKAR

Full Stack Developer | Packaged Application Development Senior Analyst
Chennai, India | +91 83443 52447 | poojasakthi053@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building and scaling enterprise applications in financial services and manufacturing domains. Currently at Accenture, delivering Finance & Wealth Management solutions — designing end-to-end REST APIs for Employee Stock Purchase Plan (ESPP) integrations, driving incident resolution, and maintaining 99%+ production uptime on Azure-hosted systems. Seeking senior full-stack or backend engineering roles in fintech or wealth management platforms. Previously served as Onsite Coordinator at Nissan Motor Limited, Japan, earning a 4.6/5 Customer Satisfaction Index (CSI) score and nominated for an Innovation Award for an automation tool that eliminated manual documentation workflows. Deep expertise across Java, Spring Boot, microservices, React.js, CI/CD pipelines, PostgreSQL, MongoDB, and Azure — with Agile/Scrum delivery experience across global cross-functional teams.

TECHNICAL SKILLS

Languages	Java, JavaScript, Python, Kotlin, SQL, HTML5, CSS3
Backend	Spring Boot, Spring MVC, RESTful APIs, Spring Security (JWT/OAuth2), Node.js, Microservices, Event-Driven Architecture
Frontend	React.js, Next.js, Redux, Chart.js, Material UI, Tailwind CSS
Databases	MySQL, PostgreSQL, MongoDB
Cloud & DevOps	Azure, AWS (Exposure), Docker, Git, CI/CD Pipelines, Postman
Testing	JUnit, Mockito, Jest, Unit Testing, Integration Testing
Methodology	Agile, Scrum, Sprint Planning, Code Review, Root Cause Analysis, Incident Management
Domain	Finance & Wealth Management, ESPP, Enterprise Application Development, Manufacturing Operations
Tools & IDE	IntelliJ IDEA, VS Code, JIRA, Confluence

PROFESSIONAL EXPERIENCE

Packaged Application Development Senior Analyst

Accenture | Chennai | Feb 2026 – Present

- Architect and deliver 10+ end-to-end REST API flows for Employee Stock Purchase Plan (ESPP) enterprise system connectivity, streamlining backend service design in Java and Spring Boot to reduce integration turnaround across cross-functional teams
- Drive backend production support for a Finance & Wealth Management client on Azure, maintaining 99%+ uptime through proactive monitoring, structured incident resolution, and root cause analysis within Agile sprint cycles
- Lead Scrum ceremonies — sprint planning, standups, retrospectives — coordinating a team of 6 across onshore and offshore stakeholders to accelerate feature delivery and reduce sprint carryover
- Implement CI/CD pipeline best practices using Git and Docker; contribute to code reviews achieving consistent unit test coverage, ensuring high-quality deployments across PostgreSQL-backed microservices

Software Engineer

RNTBCI (Renault Nissan Technology & Business Centre India) | Chennai | Jul 2022 – Jan 2026

- Designed and delivered 5+ full-stack manufacturing applications using Java, Spring Boot, React.js, MySQL, and MongoDB, enabling real-time KPI monitoring across 3 plant divisions via Chart.js dashboards
- Architected RESTful microservices and React interfaces using event-driven design patterns that replaced manual workflows for plant operations, reducing documentation cycle time for cross-functional engineering teams of 15+

- Selected as Onsite Coordinator at Nissan Motor Limited, Japan (Jun-Sep 2024) — served as the primary technical and communication bridge between India and Japan engineering teams, achieving a Customer Satisfaction Index (CSI) score of 4.6/5
- Nominated for Innovation Award for building a VBA-macro-based automation tool for AutoCAD that eliminated 100% of manual cross-reference documentation effort in electrical schematic workflows
- Wrote and maintained unit and integration tests using JUnit and Mockito; participated in system design discussions with global stakeholders in Japan on requirement alignment and delivery coordination

Developer Intern

Huawei Technologies India | Virtual | Mar 2022 – Jul 2022

- Developed features for a Smart Cooking mobile application using Java, Kotlin, and HMS SDK, integrating recipe recommendations, step-by-step guidance, and ingredient-based logic
- Participated in code reviews, bug triage, and Agile sprint cycles within a large-scale enterprise software environment, gaining exposure to production-grade development standards

KEY ACHIEVEMENTS

- **Customer Satisfaction Index: 4.6/5** — Recognized by Nissan client team for clear communication, reliable problem-solving, and consistent delivery under deadline pressure during onsite Japan engagement
- **Innovation Award Nominee** — Developed an automated cross-reference update system using VBA macros for AutoCAD, eliminating manual effort and improving documentation accuracy in electrical schematic workflows
- **Onsite Coordinator, Nissan Motor Limited, Japan (Jun-Sep 2024)** — Served as the sole technical and communication bridge for India-Japan teams, leading real-time issue resolution and stakeholder alignment across time zones

EDUCATION

B.E. Electronics & Communication Engineering | Anna University (Saranathan College of Engineering), Trichy | 2018–2022 | CGPA: 8.4/10

Full Stack Development with Generative AI | NIIT Institute | Completed 2025
